**COLD SPRING HARBOR SYMPOSIA
ON QUANTITATIVE BIOLOGY**

VOLUME LXXV

<http://symposium.cshlp.org>

Institutions that have purchased the hardcover edition of this book are entitled to online access to the Symposium website. Please contact your institution's library to gain access to the website. The site contains the full-text articles from the 2010 Symposium and previous Symposia from 2004 onward.

If you received this book from Cold Spring Harbor Laboratory Press directly, the packing slip included with this book contains your activation instructions. If you received this book from your agent, please have your agent contact us for your activation instructions.

If you do not have an account number or are experiencing access problems, please contact Kathy Cirone, CSHL Press Subscription Manager, at 1-800-843-4388, extension 4044 (Continental U.S. and Canada), 1-516-422-4100 (all other locations), cironek@cshl.edu, or sqb-feedback@highwire.stanford.edu.

COLD SPRING HARBOR SYMPOSIA ON QUANTITATIVE BIOLOGY

VOLUME LXXV

Nuclear Organization and Function

COLD SPRING HARBOR SYMPOSIA ON QUANTITATIVE BIOLOGY

Founded in 1933 by

REGINALD G. HARRIS

Director of the Biological Laboratory 1924 to 1936

Previous Symposia Volumes

I (1933) Surface Phenomena	XXXVIII (1973) Chromosome Structure and Function
II (1934) Aspects of Growth	XXXIX (1974) Tumor Viruses
III (1935) Photochemical Reactions	XL (1975) The Synapse
IV (1936) Excitation Phenomena	XLI (1976) Origins of Lymphocyte Diversity
V (1937) Internal Secretions	XLII (1977) Chromatin
VI (1938) Protein Chemistry	XLIII (1978) DNA: Replication and Recombination
VII (1939) Biological Oxidations	XLIV (1979) Viral Oncogenes
VIII (1940) Permeability and the Nature of Cell Membranes	XLV (1980) Movable Genetic Elements
IX (1941) Genes and Chromosomes: Structure and Organization	XLVI (1981) Organization of the Cytoplasm
X (1942) The Relation of Hormones to Development	XLVII (1982) Structures of DNA
XI (1946) Heredity and Variation in Microorganisms	XLVIII (1983) Molecular Neurobiology
XII (1947) Nucleic Acids and Nucleoproteins	XLIX (1984) Recombination at the DNA Level
XIII (1948) Biological Applications of Tracer Elements	L (1985) Molecular Biology of Development
XIV (1949) Amino Acids and Proteins	LI (1986) Molecular Biology of <i>Homo sapiens</i>
XV (1950) Origin and Evolution of Man	LII (1987) Evolution of Catalytic Function
XVI (1951) Genes and Mutations	LIII (1988) Molecular Biology of Signal Transduction
XVII (1952) The Neuron	LIV (1989) Immunological Recognition
XVIII (1953) Viruses	LV (1990) The Brain
XIX (1954) The Mammalian Fetus: Physiological Aspects of Development	LVI (1991) The Cell Cycle
XX (1955) Population Genetics: The Nature and Causes of Genetic Variability in Population	LVII (1992) The Cell Surface
XXI (1956) Genetic Mechanisms: Structure and Function	LVIII (1993) DNA and Chromosomes
XXII (1957) Population Studies: Animal Ecology and Demography	LIX (1994) The Molecular Genetics of Cancer
XXIII (1958) Exchange of Genetic Material: Mechanism and Consequences	LX (1995) Protein Kinesis: The Dynamics of Protein Trafficking and Stability
XXIV (1959) Genetics and Twentieth Century Darwinism	LXI (1996) Function & Dysfunction in the Nervous System
XXV (1960) Biological Clocks	LXII (1997) Pattern Formation during Development
XXVI (1961) Cellular Regulatory Mechanisms	LXIII (1998) Mechanisms of Transcription
XXVII (1962) Basic Mechanisms in Animal Virus Biology	LXIV (1999) Signaling and Gene Expression in the Immune System
XXVIII (1963) Synthesis and Structure of Macromolecules	LXV (2000) Biological Responses to DNA Damage
XXIX (1964) Human Genetics	LXVI (2001) The Ribosome
XXX (1965) Sensory Receptors	LXVII (2002) The Cardiovascular System
XXXI (1966) The Genetic Code	LXVIII (2003) The Genome of <i>Homo sapiens</i>
XXXII (1967) Antibodies	LXIX (2004) Epigenetics
XXXIII (1968) Replication of DNA in Microorganisms	LXX (2005) Molecular Approaches to Controlling Cancer
XXXIV (1969) The Mechanism of Protein Synthesis	LXXI (2006) Regulatory RNAs
XXXV (1970) Transcription of Genetic Material	LXXII (2007) Clocks and Rhythms
XXXVI (1971) Structure and Function of Proteins at the Three-dimensional Level	LXXIII (2008) Control and Regulation of Stem Cells
XXXVII (1972) The Mechanism of Muscle Contraction	LXXIV (2009) Evolution: The Molecular Landscape

Front Cover (Paperback): Images of nuclei. (*Top left*) S. Boyle, MRC Genetics Unit, Edinburgh, UK; (*top right*) K.V. Prasanth, Cold Spring Harbor Laboratory; (*bottom left*) P.A. Bubulya, Cold Spring Harbor Laboratory; (*bottom right*) R.I. Kumaran, Cold Spring Harbor Laboratory.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cold Spring Harbor Laboratory Press, provided that the appropriate fee is paid directly to the Copyright Clearance Center (CCC). Write or call CCC at 222 Rosewood Drive, Danvers, MA 01923 (508-750-8400) for information about fees and regulations. Prior to photocopying items for educational classroom use, contact CCC at the above address. Additional information on CCC can be obtained at CCC Online at <http://www.copyright.com/>

All Cold Spring Harbor Laboratory Press publications may be ordered directly from Cold Spring Harbor Laboratory Press, 500 Sunnyside Boulevard, Woodbury, New York 11797-2924. Phone: 1-800-843-4388 in Continental U.S. and Canada. All other locations: (516) 422-4100. FAX: (516) 422-4097. E-mail: cshpress@cshl.edu. For a complete catalog of all Cold Spring Harbor Laboratory Press publications, visit our World Wide Website <http://www.cshlpress.com/>

Website Access: Institutions that have purchased the hardcover edition of this book are entitled to online access to the companion website at <http://symposium.cshlp.org/>. For assistance with activation, please contact Kathy Cirone, CSHL Press Subscription Manager, at atcirone@cshl.edu.

Symposium Participants

- ACH, ROBERT, Agilent Laboratories, Agilent Technologies, Santa Clara, California
- AKIMITSU, NOBUYOSHI, Radioisotope Center, University of Tokyo, Tokyo, Japan
- ALLIS, DAVID, Laboratory of Chromatic Biology, The Rockefeller University, New York
- ALLSHIRE, ROBIN, Wellcome Trust Centre for Cell Biology, University of Edinburgh, Edinburgh, Scotland
- ALMOUZNI, GENEVIEVE, Section de Recherche, Institut Curie, UMR218, Paris, France
- AMON, ANGELIKA, MIT Cancer Center, Massachusetts Institute of Technology, Cambridge, Massachusetts
- AMOR-GUERET, MOUNIRA, UMR 3348, Centre National de la Recherche Scientifique, Institut Curie, Orsay, France
- ANDRULIS, ERIK, Dept. of Molecular Biology and Microbiology, Case Western Reserve University School of Medicine, Cleveland, Ohio
- ARAGON, LUIS, Clinical Sciences Center, MRC, Imperial College, London, United Kingdom
- ARMELIN-CORREA, LUCIA, Dept. of Biochemistry, Chemistry Institute, University of São Paulo, São Paulo, Brazil
- BAHMANYAR, SHIRIN, Dept. of Cell and Molecular Medicine, Ludwig Institute for Cancer Research, University of California at San Diego, La Jolla, California
- BAO, MARIE, *Developmental Cell*, Cell Press, Cambridge, Massachusetts
- BARAKA VISHWANTHAN, GURADATTA, Dept. of Biology, Emory University, Atlanta, Georgia
- BARDEHLE, NICOLE, Dept. of Molecular Cell Biology and Genetics, Max Planck Institute, Dresden, Germany
- BÁRTOVÁ, EVA, Dept. of Molecular Cytology and Cytometry, Institute of Biophysics, Brno, Czech Republic
- BATRAKOU, DZMITRY, Dept. of Cell and Molecular Biology, University of Edinburgh, Edinburgh, United Kingdom
- BATTLE, DANNI, Dept. of Biological and Biomedical Sciences, Durham University, Durham, United Kingdom
- BAYLIN, STEPHEN, Bunting Blaustein Cancer Research, Johns Hopkins University School of Medicine, Baltimore, Maryland
- BAYNE, ELIZABETH, Wellcome Trust Centre for Cell Biology, University of Edinburgh, Edinburgh, United Kingdom
- BAZETT-JONES, DAVID, Dept. of Cell Biology, The Hospital for Sick Children, Toronto, Canada
- BECK, DAVID, Dept. of Biochemistry, School of Medicine, New York University, New York
- BELIN, BRITTANY, Dept. of Cellular and Molecular Pharmacology, University of California, San Francisco, California
- BELMONT, ANDREW, Dept. of Cell and Structural Biology, University of Illinois, Urbana, Illinois
- BENAVIDES, MARIO, Dept. of Biology, Graduate Center, City University of New York, New York
- BERASAIN, CARMEN, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- BERGER, SHELLEY L., Dept. of Cell and Developmental Biology, University of Pennsylvania, Philadelphia, Pennsylvania
- BERGMANN, JAN, The Wellcome Trust Centre for Cell Biology, The University of Edinburgh, Edinburgh, United Kingdom
- BERMEJO MORENO, RODRIGO, Dept. of Genome Integrity, IFOM-IEO-Campus, Milan, Italy
- BERNAD, RAFAEL, Dept. of Chromosome Dynamics, Spanish National Cancer Centre, Madrid, Spain
- BERNARDI, GIORGIO, Dept. of Biology, Università degli Studi Roma Tre, Rome, Italy
- BERNSTEIN, EMILY, Dept. of Oncological Sciences, Mount Sinai School of Medicine, New York
- BERUBE, NATHALIE, Dept. of Paediatrics, University of Western Ontario, London, Canada
- BICKMORE, WENDY, Dept. of Chromosomes and Gene Expression, MRC Human Genetics Unit, Edinburgh, United Kingdom
- BLACK, BEN E., Dept. of Biochemistry and Biophysics, University of Pennsylvania, Philadelphia, Pennsylvania
- BLOBEL, GÜNTER, Dept. of Cell Biology, Rockefeller University, New York
- BODNAR, MEGAN, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- BOIREAU, STÉPHANIE, Institut de Génétique Moléculaire, Centre National de la Recherche Scientifique, Montpellier, France
- BOTCHKAREV, VLADIMIR, Centre for Skin Sciences/Dept. of Dermatology, University of Bradford/Boston University, Bradford, United Kingdom
- BOTSIOS, SOTIRIOS, Institute of Medical Sciences, University of Aberdeen, Aberdeen, United Kingdom
- BOYER, LAURIE, Dept. of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts
- BRENNER, SYDNEY, Salk Institute for Biological Studies, San Diego, California
- BRICKNER, JASON, Dept. of Biochemistry, Molecular Biology and Cell Biology, Northwestern University, Evanston, Illinois
- BROWN, JILL, Molecular Haematology Unit, MRC Weatherall Institute of Molecular Medicine, Oxford, United Kingdom
- BRUNELLE, MYLENE, Dept. of Biology, Université de Sherbrooke, Sherbrooke, Canada

- BUBULYA, PAULA, Dept. of Biological Sciences, Wright State University, Dayton, Ohio
- BUCKLE, VERONICA, Weatherall Institute of Molecular Medicine, Oxford University, Oxford, United Kingdom
- BURATOWSKI, STEPHEN, Dept. of Biological Chemistry, Harvard Medical School, Boston, Massachusetts
- BURGESS, REBECCA, Dept. of Biochemistry and Molecular Biology, Mayo Clinic College of Medicine, Rochester, Minnesota
- BUSCAINO, ALESSIA, Wellcome Trust Centre for Cell Biology, University of Edinburgh, Edinburgh, United Kingdom
- BYSTRICKY, KERSTIN, LBME, University of Toulouse, Toulouse, France
- CAMPALANS, ANNA, IRCM/SIGRR, CEA (Commissariat à l'énergie atomique), Fontenay aux Roses, France
- CAREY, BRYCE, Dept. of Biology, Whitehead/MIT, Cambridge, Massachusetts
- CAVALLI, GIACOMO, Institute of Human Genetics, CNRS, Montpellier, France
- CHAN, SIMON, Dept. of Plant Biology, University of California, Davis, California
- CHANDRA, TAMIR, Dept. of Oncology, Cancer Research UK/Cambridge University, Cambridge, United Kingdom
- CHATURVEDI, PANKAJ, Dept. of Cell Biology, Center for Cellular and Molecular Biology, Hyderabad, India
- CHEN, FENG, *Molecular Cell*, Cell Press, Cambridge, Massachusetts
- CHEN, LING-LING, Dept. of Genetics and Developmental Biology, Health Center, University of Connecticut, Farmington, Connecticut
- CHEN, MUHAN, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- CHICAS, AGUSTIN, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- CHING, REAGAN, Dept. of Genetics and Genome Biology, The Hospital for Sick Children, Toronto, Canada
- CHIOLO, IRENE, Dept. of Genome Biology, Lawrence Berkeley National Laboratory, Berkeley, California
- CHO, UHN-SOO, Dept. of Biological Chemistry and Molecular Pharmacology, Harvard Medical School/HHMI, Boston, Massachusetts
- CHUBB, JONATHAN, College of Life Sciences, University of Dundee, Dundee, United Kingdom
- CHUNG, INN, Dept. of Genome Organization and Function, German Cancer Research Center (DKFZ), Heidelberg, Germany
- CLAYCOMB, JULIE, Program in Molecular Medicine, University of Massachusetts Medical School, Worcester, Massachusetts
- CLEVELAND, DON W., Ludwig Institute for Cancer Research, University of California at San Diego, La Jolla, California
- COHEN, ILANA, Dept. of Biology, Technion, Haifa, Israel
- CONNELL, LAUREEN, *Genes & Development*, Cold Spring Harbor Laboratory Press, Cold Spring Harbor, New York
- COOK, ADAM, Chromatin Dynamics Laboratory, Institut Curie/UMR218, Centre National de la Recherche Scientifique, Paris, France
- CORPET, ARMELLE, UMR218, Institut Curie, Paris, France
- CREMER, CHRISTOPH, Kirchhoff Institute for Physics, University Heidelberg, Heidelberg, Germany
- CREMER, THOMAS, Biology Dept., Ludwig-Maximilians-Universität München, Martinsreid/Münich, Germany
- DAGUENET, ELISABETH, IGBMC-CERBM, Illkirch, France
- DAI, JIEQIONG, GBB, The National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, Maryland
- D'ANGELO, MAXIMILIANO, MCBL-Z, The Salk Institute, La Jolla, California
- DARNELL, JAMES, Dept. of Molecular Cell Biology, The Rockefeller University, New York
- DE LANGE, TITIA, de Lange Laboratory, The Rockefeller University, New York
- DE THÉ, HUGUES, Dept. of Biology, Centre National de la Recherche Scientifique, Université Paris7 Diderot/INSERM, Paris, France
- DEKKER, JOB, Program in Gene Function and Expression, University of Massachusetts Medical School, Worcester, Massachusetts
- DELBARRE, ERWAN, IMB/Dept. of Biochemistry, University of Oslo, Oslo, Norway
- DELL'ORSO, STEFANIA, National Institute of Arthritis and Musculoskeletal and Skin Diseases, National Institutes of Health, Bethesda, Maryland
- DERYUSHEVA, SVETLANA, Dept. of Embryology, Carnegie Institution for Science, Baltimore, Maryland
- DIFFLEY, JOHN, Clare Hall Laboratories, Cancer Research, UK London Research Institute, South Mimms, United Kingdom
- DOBRUCKI, JUREK, Dept. of Cell Biophysics, Jagiellonian University, Krakow, Poland
- DOKSHIN, GREGORIY, Page Lab, Massachusetts Institute of Technology, Cambridge, Massachusetts
- DONOHUE, MARY, Dept. of Epigenetics and Stem Cells, Burke Medical Research Institute/Weill Cornell Med, White Plains, New York
- DUNDR, MIREK, Dept. of Cell Biology, Rosalind Franklin University of Medicine and Science, North Chicago, Illinois
- EARNSHAW, WILLIAM, Wellcome Trust Centre for Cell Biology, University of Edinburgh, Edinburgh, United Kingdom
- ECKERSLEY-MASLIN, MELANIE, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- EDENBERG, ELLEN, Dept. of Biochemistry and Biophysics, University of California at San Francisco, San Francisco, California
- EKKAM, MUHAMMAD, Dept. of Biological Sciences, Louisiana State University, Baton Rouge, Louisiana
- ERCAN, SEVINC, Dept. of Biology, University of North Carolina, Chapel Hill, North Carolina
- ESKELAND, RAGNHILD, Medical Research Council, MRC Human Genetics Unit, Edinburgh, United Kingdom
- EUSKIRCHEN, GHIA, Dept. of Genetics, Stanford University, Palo Alto, California
- FABRE, EMMAMUELLE, Dept. of Genomes and Genetics, Centre National de la Recherche Scientifique, Institut Pasteur, Paris, France
- FACHINETTI, DANIELE, Dept. of Cellular Molecular and

- Medicine (CMM), Ludwig Institute for Cancer Research, La Jolla, California
- FADDAH, DINA, Dept. of Biology, Massachusetts Institute of Technology/Whitehead Institute, Cambridge, Massachusetts
- FAHRENKROG, BIRTHE, Institute of Molecular Biology and Medicine, Free University of Brussels, Gosselies, Belgium
- FEDORIW, ANDREW, Dept. of Genetics, University of North Carolina Chapel Hill, Chapel Hill, North Carolina
- FELSENFELD, GARY, Laboratory of Molecular Biology, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, Maryland
- FESSING, MICHAEL, Centre for Skin Sciences, University of Bradford, Bradford, United Kingdom
- FOISNER, ROLAND, Dept. of Biochemistry and Molecular Cell Biology, University of Vienna, Vienna, Austria
- FONSECA, DANA, Dept. of Chemistry, Hunter College, City University of New York, New York
- FOSTER, CLARE, Dept. of Biological and Biomedical Sciences, Durham University, Durham, United Kingdom
- FRASER, PETER, Laboratory of Chromatin and Gene Expression, Babraham Institute, Cambridge, United Kingdom
- FUDENBERG, GEOFFREY, HST, Massachusetts Institute of Technology, Cambridge, Massachusetts
- FUNABIKI, HIRONORI, Lab of Chromosome and Cell Biology, The Rockefeller University, New York
- FUSSNER, EDEN, Dept. of Biochemistry, University of Toronto, Toronto, Canada
- GALANDE, SANJEEV, Centre for Epigenetics, Indian Institute of Science Education and Research, Pune, India
- GALANI, KIKI, Dept. of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts
- GALIOVÁ, GABRIELA, Dept. of Molecular Cytology and Cytometry, Institute of Biophysics, Brno, Czech Republic
- GALL, JOSEPH, Dept. of Embryology, Carnegie Institution, Baltimore, Maryland
- GARRARD, WILLIAM, Dept. of Molecular Biology, UT Southwestern Medical Center, Dallas, Texas
- GASCOIGNE, KAREN, Dept. of Biology, Whitehead Institute-MIT, Cambridge, Massachusetts
- GASSER, SUSAN, Dept. of Epigenetics, Friedrich Miescher Institute for Biomedical Research, Basel, Switzerland
- GERBI, SUSAN, Dept. of Molecular Biology, Cell Biology and Biochemistry, Brown University, Providence, Rhode Island
- GHENOIU, CRISTINA, Laboratory of Chromosome and Cell Biology, The Rockefeller University, New York
- GIBBS-SEYMOUR, IAN, Dept. of Biological Sciences, University of Durham, Durham, United Kingdom
- GIGLIA-MARI, GIUSEPPINA, Dept. of Cancer Biology, Centre National de la Recherche Scientifique, Toulouse, France
- GILBERT, DAVID, Dept. of Biological Science, Florida State University, Tallahassee, Florida
- GODON, CAMILLE, UMR5089, Centre National de la Recherche Scientifique, Toulouse, France
- Recherche Scientifique, Toulouse, France
- GOLDMAN, ANNE, Dept. of Cell and Molecular Biology, Northwestern University Medical School, Chicago, Illinois
- GOLDMAN, ROBERT, Dept. of Cell and Molecular Biology, Northwestern University Medical School, Chicago, Illinois
- GONÇALVES, MARIA TERESA, UBCE, IMM-Instituto de Medicina Molecular, Lisbon, Portugal
- GONDOR, ANITA, MTC, Karolinska Institute, Stockholm, Sweden
- GORJANACZ, MATYAS, Directors' Research, European Molecular Biology Laboratory, Heidelberg, Germany
- GORSKI, STAN, *The EMBO Journal*, Heidelberg, Germany
- GOULBOURNE, CHRIS, Sir William Dunn School of Pathology, Oxford University, Oxford, United Kingdom
- GREEN, VICTORIA, Antiviral Gene Therapy Research Unit, University of the Witwatersrand, Johannesburg, South Africa
- GREWAL, SHIV, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- GRODZICKER, TERRI, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- GRUMMT, INGRID, Dept. of Molecular Biology of the Cell II, German Cancer Research Center, Heidelberg, Germany
- GUGLIELMI, BENJAMIN, Dept. of Molecular and Cell Biology, University of California, Berkeley, California
- GUILLEMETTE, BENOIT, IRIC, Université de Montréal, Montréal, Canada
- GULER, GULFEM, Dept. of Biological Sciences, Vanderbilt University, Nashville, Tennessee
- GÜNESDOĞAN, UFUK, Dept. of Molecular Developmental Biology, Max Planck Institute for Biophysical Chemistry, Göttingen, Germany
- GURDON, JOHN, Wellcome Trust Cancer Research, University of Cambridge, Cambridge, United Kingdom
- HABER, JAMES, Dept. of Biology, Brandeis University, Waltham, Massachusetts
- HAHN, MATTHIAS, Dept. of Molecular Biology, Ludwig-Maximilians-Universität München, München, Germany
- HAKIM, OFIR, NCI/LRBGE, National Institutes of Health, Bethesda, Maryland
- HANNA, JACOB (YAQUB), Dept. of Biology, Whitehead Institute for Biomedical Research, Massachusetts Institute of Technology, Cambridge, Massachusetts
- HARRISON, STEPHEN C., Harvard Medical School, Boston, Massachusetts
- HEARD, EDITH, Mammalian Development Epigenetics Group, Institut Curie, CNRS UMR218, Paris, France
- HELENIUS, KATJA, Institute of Biotechnology, University of Helsinki, Helsinki, Finland
- HEMERLY, ADRIANA, Instituto de Bioquímica Médica, Universidade Federal do Rio de Janeiro, Rio de Janeiro, Brazil
- HENIKOFF, STEVEN, Howard Hughes Medical Institute, Fred Hutchinson Cancer Research Center, Seattle, Washington
- HERRMANN, HARALD, Dept. of Molecular Genetics, German Cancer Research Center, Heidelberg, Germany

- HETZER, MARTIN, Molecular and Cell Biology Laboratory, The Salk Institute for Biological Studies, La Jolla, California
- HEYDARIAN, MOHAMMAD, Dept. of Biological Chemistry, Johns Hopkins University School of Medicine, Baltimore, Maryland
- HIEDA, MIKI, Graduate School of Medicine, Osaka University, Suita, Japan
- HIGGINS, MICHAEL, Dept. of Molecular and Cellular Biology, Roswell Park Cancer Institute, Buffalo, New York
- HOCKEMEYER, DIRK, Jaenisch Lab, Whitehead Institute, Cambridge, Massachusetts
- HOLASKA, JAMES, Dept. of Medicine and Cardiology, University of Chicago, Chicago, Illinois
- HOLMES, REBECCA, Dept. of Biochemistry and Biophysics, University of California at San Francisco, San Francisco, California
- HOZAK, PAVEL, Dept. of Biology of the Cell Nucleus, Institute of Molecular Genetics, Prague 4, Czech Republic
- HU, GANGQING, Laboratory of Molecular Immunology, National Heart, Lung and Blood Institute, Bethesda, Maryland
- HUA, CHIA-YIN, Institute of Cellular and Organism Biology, Academia Sinica, Taipei, Taiwan
- HUANG, SUI, Dept. of Cell and Molecular Biology, Northwestern University School of Medicine, Chicago, Illinois
- HUDDLESTON, JOANNA, Dept. of Oncology, Cancer Research UK, University of Cambridge, Cambridge, United Kingdom
- HUEBNER, MICHAEL, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- ILIK, IBRAHIM, Dept. of Chromatin Regulation, Max-Planck Institute for IB Freiburg, Freiburg, Germany
- INOUE, NORIMITSU, Dept. of Molecular Genetics, Osaka Medical Center for Cancer, Osaka, Japan
- ISHOV, ALEXANDER, Dept. of Anatomy and Cell Biology, University of Florida, Gainesville, Florida
- IWASAKI, OSAMU, Gene Expression and Regulation Program, Wistar Institute, Philadelphia, Pennsylvania
- JAENISCH, RUDOLF, Dept. of Biomedical Research, Whitehead Institute/MIT, Cambridge, Massachusetts
- JAKIMO, ALAN, School of Law, Hofstra University, Woodbury, New York
- JELINEK, TOM, Dept. of Research and Development, Active Motif, Lake Placid, New York
- JEON, YESU, Dept. of Molecular Biology, Massachusetts General Hospital, Boston, Massachusetts
- JERONIMO, CELIA, Dept. of Molecular Biology, IRCM, Montreal, Canada
- JIA, JUNLING, Dept. of Embryology, HHMI-Carnegie Institution, Baltimore, Maryland
- JIMÉNEZ-GARCÍA, LUIS, Dept. of Cell Biology, Universidad Nacional Autónoma de México (UNAM), Mexico City, Mexico
- JOYNER, RYAN, Dept. of Molecular and Cell Biology, University of California, Berkeley, Berkeley, California
- JUGE, FRANCOIS, Dept. of Metazoan mRNA Metabolism, Institute of Molecular Genetics, Montpellier, France
- KAMIENIARZ, KINGA, Spemann Laboratories, Max-Planck-Institute Freiburg, Freiburg, Germany
- KAO, CHENG-FU, Institute of Cellular and Organismic Biology, Academia Sinica, Taipei, Taiwan
- KARNANI, NEERJA, Dept. of Biochemistry and Molecular Genetics, University of Virginia, Charlottesville, Virginia
- KAWASHIMA, AI, Laboratory of Yeast Genetics and Cell Biology, The Rockefeller University, New York
- KAWASHIMA, SHIGEHITO, Laboratory of Chemistry and Cell Biology, The Rockefeller University, New York
- KEATON, MIGNON, Dept. of Biochemistry and Molecular Genetics, University of Virginia, Charlottesville, Virginia
- KHODUCHENKO, TATIANA, Dept. of Cytology and Histology, Saint-Petersburg State University, Saint Petersburg, Russia
- KIM, HANA, Dept. of Biological Sciences, Louisiana State University, Baton Rouge, Louisiana
- KIM, JOOMYEONG, Dept. of Biological Sciences, Louisiana State University, Baton Rouge, Louisiana
- KIM, SOOJIN, Dept. of Biochemistry and Molecular Genetics, University of Colorado School of Medicine, Aurora, Colorado
- KIM, YOUNGJO, Dept. of Embryology, HHMI-Carnegie Institution, Baltimore, Maryland
- KIMURA, KEIJI, Graduate School of Life and Environmental Sciences, University of Tsukuba, Tsukuba Science City, Japan
- KIND, JOP, Dept. of Gene Regulation, The Netherlands Cancer Institute, Amsterdam, The Netherlands
- KINGSTON, ROBERT, Dept. of Molecular Biology, Massachusetts General Hospital/Harvard Medical School, Boston, Massachusetts
- KIRSCHNER, KRISTINA, Cambridge Research Institute, Cancer Research UK, Cambridge, United Kingdom
- KORFALL, NADIA, Dept. of Cell Biology, Edinburgh University, Edinburgh, United Kingdom
- KORNBLIHTT, ALBERTO, LFBM-IFIBYNE-CONICET, University of Buenos Aires, Buenos Aires, Argentina
- KUMARAN, R. ILENG, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- KUMETA, MASAHIRO, Graduate School of Biostudies, Kyoto University, Kyoto, Japan
- KÜNTZIGER, THOMAS, IMB/Biochemistry, University of Oslo, Oslo, Norway
- KUSCU, CANAN, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- LAGRANGE, THIERRY, LGDP, Centre National de la Recherche Scientifique, Perpignan, France
- LAI, TSUNG-PO, Dept. of Molecular Genetics, Ohio State University, Columbus, Ohio
- LAL, NEERAJ, Dept. of Biochemistry and Molecular Medicine, Davis Medical Center, University of California, Sacramento
- LALL, SABBİ, Nature Publishing Group, New York
- LAU, PRISCILLA, Medical Biophysics, University of Toronto/Ontario Cancer Institute, Toronto, Ontario, Canada
- LAURELL, EVA, Institute of Biochemistry, ETH Zürich, Zürich, Switzerland

- LAWRENCE, JEANNE B., University of Massachusetts Medical School, Worcester, Massachusetts
- LEJEUNE, ERWAN, Dept. of Chromosome Biology, Wellcome Trust Centre, Edinburgh, United Kingdom
- LEUTZ, ACHIM, Dept. of Oncology, Max Delbrück Center for Molecular Medicine, Berlin, Germany
- LEVERSHA, MARGARET, Molecular Cytogenetics Core, Memorial Sloan-Kettering Cancer Center, New York
- LEVY, DANIEL, Dept. of Molecular and Cell Biology, University of California, Berkeley, California
- LEWANDOWSKA, MARZENA, Dept. of Cell and Molecular Biology, Northwestern University, Chicago, Illinois
- LI, JINGJING, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- LI, QIAN, Dept. of Cell Biology, Institute of Biochemistry and Cell Biology, Shanghai, China
- LIGHT, WILLIAM, BMBCB, Northwestern University, Evanston, Illinois
- LIS, JOHN, Dept. of Molecular Biology and Genetics, Cornell University, Ithaca, New York
- LIU, YILEI, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- LONGMAN, DASA, IGMM, Western General Hospital, MRC Human Genetics Unit, Edinburgh, United Kingdom
- LOPEZ MEJIA, ISABEL CRISTINA, Centre National de la Recherche Scientifique, UMR 5535, Institut de Genetique Moleculaire de Montpellier, Montpellier, France
- LOYTER, ABRAHAM, Dept. of Biological Chemistry, The Hebrew University, Jerusalem, Israel
- MAESHIMA, KAZUHIRO, Structural Biology Center, National Institute of Genetics, Mishima, Japan
- MAHESHWARI, SHAMONI, Molecular Biology and Genetics, Cornell University, Ithaca, New York
- MALIK, POONAM, Institute of Cell Biology, University of Edinburgh, Edinburgh, United Kingdom
- MALL, MORITZ, Directors' Research, EMBL, Heidelberg, Germany
- MAO, STEVE, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- MAO, YUNTAO, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- MAQUAT, LYNNE, Dept. of Biochemistry and Biophysics, University of Rochester Medical Center, Rochester, New York
- MARCUS, EMILIE, *Cell*, Cell Press, Cambridge, Massachusetts
- MARI, PIERRE-OLIVIER, Dept. of Cancer Biology, Centre National de la Recherche Scientifique, Toulouse, France
- MARINO, JOSEPH, Dept. of Biochemistry, ETH Zürich, Zürich, Switzerland
- MARKAKI, YOLANDA, Humagenetic, Biology II, LMU München, München, Germany
- MARTIENSSEN, ROBERT, Delbrück Laboratory, Cold Spring Harbor Laboratory, Cold Spring Harbor, New York
- MARTINS, SANDRA, Dept. of Cell Biology (UBCe), Institute of Molecular Medicine (IMM), Lisbon, Portugal
- MASUDA, HIRO-TAKA, Graduate School of Life Science, Hokkaido University, Sapporo, Japan
- MASUI, OSAMU, UMR 3215 U 934, Curie Institute, Paris, France
- MATERA, A. GREGORY, Biology Department, University of North Carolina at Chapel Hill, Chapel Hill, North Carolina
- MCCORD, RACHEL, Division of Genetics, Brigham and Women's Hospital, Boston, Massachusetts
- MCGHEE, JAMES, Dept. of Biochemistry and Molecular Biology, University of Calgary, Calgary, Canada
- MEABURN, KAREN, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- MELLONE, BARBARA, Dept. of Molecular and Cell Biology, University of Connecticut, Storrs, Connecticut
- MEYER, BARBARA, Molecular and Cellular Biology Dept., HHMI/ U.C. Berkeley, Berkeley, California
- MISTELI, TOM, Cell Biology of Genomes Dept., National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- MOHAN, RYAN, Stowers Institute for Medical Research, Kansas City, Missouri
- MOR, AMIR, Dept. of Life Science, Bar Ilan University, Ramat-Gan, Israel
- MOSHKOVITZ, SHARON, Cancer Research Center, Sheba Medical Center, Tel-Hashomer, Israel
- MOURGUES, SOPHIE, UMR 5089, Centre National de la Recherche Scientifique, Toulouse, France
- MOUSAVI, KAMBIZ, NIAMS, National Institutes of Health, Bethesda, Maryland
- MUCHARDT, CHRISTIAN, Dept. of Biologie du Développement-Monod, Institut Pasteur, Paris, France
- MUERS, MARY, *Nature Reviews Genetics*, London, United Kingdom
- MURAMOTO, HIROKI, Dept. of Animal Resource Sciences, The University of Tokyo, Bunkyo-ku, Tokyo, Japan
- MUTTI, NAVDEEP, School of Life Sciences, Arizona State University, Tempe, Arizona
- NASMYTH, KIM, Dept. of Biochemistry, University of Oxford, Oxford, United Kingdom
- NAUMOVA, NATALIA, Dept. of Gene Function and Expression, University of Massachusetts Medical School, Worcester, Massachusetts
- NEZI, LUIGI, Dept. of Pediatric Oncology, Dana-Farber Cancer Institute, Boston, Massachusetts

 Fourth row: N. Rusk, J. Stamatoyannopoulos; R. Young, M. Muers; J. Takeda*

First row: J. Gall; R. Jaenisch, E. Marcus; W. Bickmore, H. Sussman
Second row: Cocktail party
Third row: S. Gerbi, T. Stearns; J. Darnell, J. Lis; S. Lall, K. Zaret
Fourth row: S. Brenner, B. Meyer; R. Sever, J. Steitz; D. Rhodes, D. Reinberg

Foreword

The decision to focus the historic 75th Symposium on the Dynamic Organization of Nuclear Function reflects the growing convergence between descriptive cell-biological approaches to the nucleus and mechanism-driven approaches to nuclear processes that is now illuminating the structural and functional operations of the primary control center of the cell. Many previous Symposia have been devoted to nuclear organization and function, notably *Genes and Chromosomes: Structure and Organization* (1941), *Genetic Mechanisms: Structure and Function* (1956), *Chromosomes Structure and Function* (1973), *Chromatin* (1977), *Structures of DNA* (1982), *DNA and Chromosomes* (1993), and *Epigenetics* (2004). Every decade has seen important advances in the field, thus it is unsurprising that past Symposia have shed light from many angles on the function of the central organelle of biology.

A major theme of this year's Symposium addressed the emerging relationships among chromosome structure, genome function, and gene expression. Techniques have now emerged that allow the monitoring of chromatin states in cell lines and in vivo using molecular tags and sophisticated microscopy during differentiation. New methods to pinpoint the molecular mechanisms and intranuclear organization underlying transcriptionally active versus inactive chromatin are revealing extraordinary organizational complexity within the nucleus.

Epigenetic mechanisms such as DNA methylation, histone posttranslational modifications such as acetylation and methylation, imprinting, RNA interference, and gene silencing are also subject to dynamic organization in the nucleus. Epigenetic changes are important contributors to the pathogenesis of disease in humans, animals, and plants and may lie at the heart of many important gene-environment interactions. Research is illuminating how epigenetic mechanisms have important roles in regulating the structure and function of the genome, and the 2010 Symposium particularly highlighted the relationships among the genome, epigenome, and nuclear architecture and environment.

The role of signaling in regulating transcription, mRNA export, and chromatin structure was also examined. For example, signaling from or at the nuclear envelope reveals novel mechanisms for influencing nuclear envelope morphology, breakdown, and cell differentiation. Chromatin dynamics was another major theme, both of the chromatin fiber and of chromatin-binding proteins involved in replication and repair, with new results discussed in areas such as the programming of DNA replication origins and their specificity. The latest developments in our understanding of mitotic and meiotic chromosome dynamics, as well as the roles for nuclear transport factors in cell cycle progression, were also covered.

Tremendous progress is also being made in analyzing the mechanisms of assembly for nuclear bodies and their functional roles. Regulated transport into and out of the nucleus through the nuclear pore complex and the operation of selective transport mechanisms also featured prominently, leading to vigorous discussion of the competing models for facilitated transport, as well as reports of new factors required for mRNA export, tRNA shuttling, and pore complex assembly. There is growing evidence that pore permeability and nuclear leakiness change in a regulated way with cell differentiation and age.

The meeting addressed how nuclear organization and function are linked to the underpinnings of several pathophysiological states including the laminopathies such as A-type lamin dysfunction in the premature aging disease progeria and the molecular determinants of cancer-prone symptoms of xeroderma pigmentosum and Cockayne syndrome, of the fatal bone marrow failure syndrome dyskeratosis congenita, and of the Roberts and Cornelia de Lange developmental syndromes. The relationship between nuclear architecture and aging and disease was the subject of a masterful Dorcas Cummings address on "The Unexpected Link between Premature Aging and Nuclear Organization" by Robert Goldman to a combined audience of scientists and lay friends and neighbors.

In arranging this Symposium, the organizers were dependent on the guidance of a broad cadre of advisors including Drs. Robert Goldman, Robert Kingston, Kim Nasmyth, Daniela Rhodes, and Pam Silver. Opening night speakers included John Gurdon, Rob Martienssen, Barbara Meyer, and Günter Blobel. Joseph Gall presented the Reginald Harris lecture on "Transcription, RNA Processing, and Nuclear Bodies." Steven Henikoff closed the meeting with a masterful and thought-provoking summary.

This Symposium was attended by more than 400 scientists from more than 25 countries, and the program included 68 invited presentations and 219 poster presentations. To disseminate the latest results and discuss

sion of the Symposium to a wider audience, attendees were able to share many of the Symposium talks with their colleagues who were unable to attend using the Leading Strand video archive, and interviews by Sabbi Lall, Emilie Marcus, Richard Sever, and Jan Witkowski with leading experts in the field were arranged during the Symposium and distributed as free videos from the Cold Spring Harbor Symposium Chats website.

We thank Val Pakaluk, Mary Smith, and Ed Campodonico and his staff in the Meetings and Courses Program for their assistance in organizing and running the Symposium, and John Inglis and his staff at Cold Spring Harbor Laboratory Press, particularly Joan Ebert, Rena Steuer, Barbara Acosta, and Kathy Bubbeo for publishing the printed and online versions of the Symposium proceedings. Jan Witkowski (organizer of the 75th Symposium anniversary celebratory meeting that preceded this Symposium) and photographer Connie Brukin captured candid snapshots throughout the meeting.

Funds to support this meeting were obtained from the National Institute of General Medical Sciences, a branch of the National Institutes of Health. Financial support from the corporate sponsors of our meetings program is essential for these Symposia to remain a success, and we are most grateful for their continued support.

Symposium Participants	v
Foreword	xix

Chromatin Modifications and Gene Expression

<i>Drosophila</i> Heat Shock System as a General Model to Investigate Transcriptional Regulation <i>M.J. Guertin, S.J. Petesch, K.L. Zobek, I.M. Min, and J.T. Lis</i>	1
Chromatin in the Nuclear Landscape <i>D.B. Beck, R. Bonasio, S. Kaneko, G. Li, G. Li, R. Margueron, H. Oda, K. Sarma, R.J. Sims III, J. Son, P. Trojer, and D. Reinberg</i>	11
Cell Signaling and Transcriptional Regulation via Histone Phosphorylation <i>S.L. Berger</i>	23
HIRA and Daxx Constitute Two Independent Histone H3.3-Containing Predeposition Complexes <i>S.J. Elsaesser and C.D. Allis</i>	27
The INO80 Family of Chromatin-Remodeling Enzymes: Regulators of Histone Variant Dynamics <i>S. Watanabe and C.L. Peterson</i>	35
Role of K3K27 Demethylases Jmjd3 and UTX in Transcriptional Regulation <i>M.R. Hübner and D.L. Spector</i>	43
Epigenetic Inheritance of Centromeres <i>S. Henikoff and T. Furuyama</i>	51
Functional Dissection of Polycomb Repressive Complex 1 Reveals the Importance of a Charged Domain <i>D.J. Grau, J.M. Antao, and R.E. Kingston</i>	61
Histone Acetylation and the Maintenance of Chromatin Compaction by Polycomb Repressive Complexes <i>R. Eskeland, E. Freyer, M. Leeb, A. Wutz, and W.A. Bickmore</i>	71
Chromatin Boundaries, Insulators, and Long-Range Interactions in the Nucleus <i>K.E. Giles, H. Gowher, R. Ghirlando, C. Jin, and G. Felsenfeld</i>	79

Transcription and Beyond

Nuclear Origins of Cell-to-Cell Variability <i>Z. Waks and P.A. Silver</i>	87
The Role of Cotranscriptional Histone Methylations <i>S. Buratowski and T. Kim</i>	95
Chromatin and Alternative Splicing <i>M. Alló, I.E. Schor, M.J. Muñoz, M. de la Mata, E. Agirre, J. Valcárcel, E. Eyras, and A.R. Kornblihtt</i>	103
Nuclear Physics: Quantitative Single-Cell Approaches to Nuclear Organization and Gene Expression <i>T. Lionnet, B. Wu, D. Grünwald, R.H. Singer, and D.R. Larson</i>	113
CBP80-Promoted mRNP Rearrangements during the Pioneer Round of Translation, Nonsense-Mediated mRNA Decay, and Thereafter <i>L.E. Maquat, J. Hwang, H. Sato, and Y. Tang</i>	127

DNA Replication and Genome Integrity

The Many Faces of Redundancy in DNA Replication Control <i>J.F.X. Diffley</i>	135
Space and Time in the Nucleus: Developmental Control of Replication Timing and Chromosome Architecture <i>D.M. Gilbert, S.-I. Takebayashi, T. Ryba, J. Lu, B.D. Pope, K.A. Wilson, and I. Hiratani</i>	143
Heterochromatin at Mouse Pericentromeres: A Model for De Novo Heterochromatin Formation and Duplication during Replication <i>C. Maison, J.-P. Quivy, A.V. Probst, and G. Almouzni</i>	155
How Shelterin Solves the Telomere End-Protection Problem <i>T. de Lange</i>	167
The Smc5/6 Complex: More than Repair? <i>A. Kegel and C. Sjögren</i>	179

Reprogramming and Differentiation

Efficiencies and Mechanisms of Nuclear Reprogramming <i>V. Pasque, K. Miyamoto, and J.B. Gurdon</i>	189
Gene Targeting in Human Pluripotent Cells <i>D. Hockemeyer and R. Jaenisch</i>	201

Epigenetic Reprogramming of Mouse Germ Cells toward Totipotency <i>M.A. Surani and P. Hajkova</i>	211
Nuclear Mobility and Mitotic Chromosome Binding: Similarities between Pioneer Transcription Factor FoxA and Linker Histone H1 <i>K.S. Zaret, J.M. Caravaca, A. Tulin, and T. Sekiya</i>	219
Connecting Transcriptional Control to Chromosome Structure and Human Disease <i>J.J. Newman and R.A. Young</i>	227
Transcription Factors for the Modulation of Pluripotency and Reprogramming <i>J.-C.D. Heng, Y.L. Orlov, and H.-H. Ng</i>	237
Changes in Chromatin Fiber Density as a Marker for Pluripotency <i>E. Fussner, K. Ahmed, H. Dehghani, M. Strauss, and D.P. Bazett-Jones</i>	245
Cancer Epigenetics: From Disruption of Differentiation Programs to the Emergence of Cancer Stem Cells <i>P. Scaffidi and T. Misteli</i>	251

Heterochromatin Formation and Gene Silencing

Assembly and Functions of Heterochromatin in the Fission Yeast Genome <i>O. Aygün and S.I.S. Grewal</i>	259
Germline Reprogramming of Heterochromatin in Plants <i>K.M. Creasey and R.A. Martienssen</i>	269
On the Connection between RNAi and Heterochromatin at Centromeres <i>E. Lejeune, E.H. Bayne, and R.C. Allshire</i>	275
Evolutionary History of Plant Multisubunit RNA Polymerases IV and V: Subunit Origins via Genome-Wide and Segmental Gene Duplications, Retrotransposition, and Lineage-Specific Subfunctionalization <i>S.L. Tucker, J. Reece, T.R. Ream, and C.S. Pikaard</i>	285
Transcriptional Interference and Gene Orientation in Yeast: Noncoding RNA Connections <i>M. Gullerova and N.J. Proudfoot</i>	299

Nuclear Bodies and RNA Biology

Cajal Bodies and Histone Locus Bodies in <i>Drosophila</i> and <i>Xenopus</i> <i>Z.F. Nizami, S. Deryusheva, and J.G. Gall</i>	313
Down-Regulation of a Host microRNA by a Viral Noncoding RNA <i>D. Cazalla and J.A. Steitz</i>	321
Long Noncoding RNAs as Enhancers of Gene Expression <i>U.A. Ørom, T. Derrien, R. Guigo, and R. Shiekhattar</i>	325
Chromatin Structure and Nuclear Organization Dynamics during X-Chromosome Inactivation <i>E.P. Nora and E. Heard</i>	333
XIST RNA and Architecture of the Inactive X Chromosome: Implications for the Repeat Genome <i>L.L. Hall and J.B. Lawrence</i>	345
Noncoding Transcripts in Sense and Antisense Orientation Regulate the Epigenetic State of Ribosomal RNA Genes <i>H. Bierhoff, K. Schmitz, F. Maass, J. Ye, and I. Grummt</i>	357
Genetic Analysis of Nuclear Bodies: From Nondeterministic Chaos to Deterministic Order <i>T.K. Rajendra, K. Praveen, and A.G. Matera</i>	365

Chromosome Structure and Mitosis

Splitting the Nucleus: What's Wrong with the Tripartite Ring Model? <i>K. Nasmyth and R.A. Oliveira</i>	375
Physical Linkages between Sister Chromatids and Their Removal during Yeast Chromosome Segregation <i>J. Baxter and L. Aragón</i>	389
Molecular Structures and Interactions in the Yeast Kinetochore <i>U.-S. Cho, K.D. Corbett, J. Al-Bassam, J.J. Bellizzi III, P. De Wulf, C.W. Espelin, J.J. Miranda, K. Simons, R.R. Wei, P.K. Sorger, and S.C. Harrison</i>	395
Centromere Identity, Function, and Epigenetic Propagation across Cell Divisions <i>B.E. Black, L.E.T. Jansen, D.R. Foltz, and D.W. Cleveland</i>	403
Temporal and Spatial Regulation of Targeting Aurora B to the Inner Centromere <i>Y. Watanabe</i>	419
The Life Cycle of Centrioles <i>E. Hatch and T. Stearns</i>	425
Proteomics of Isolated Mitotic Chromosomes Identifies the Kinetochore Protein Ska3/Rama1 <i>S. Ohta, J.-C. Bukowski-Wills, L. Wood, F. de Lima Alves, Z. Chen, J. Rappsilber, and W.C. Earnshaw</i>	433
New Insight into the Mitotic Chromosome Structure: Irregular Folding of Nucleosome Fibers Without 30-nm Chromatin Structure <i>K. Maeshima, S. Hihara, and H. Takata</i>	439
Thoughts on Aneuploidy <i>E.M. Torres, B.R. Williams, Y.-C. Tang, and A. Amon</i>	445

Chromatin Structure and Organization

Insights into Interphase Large-Scale Chromatin Structure from Analysis of Engineered Chromosome Regions <i>A.S. Belmont, Y. Hu, P.B. Sinclair, W. Wu, Q. Bian, and I. Kireev</i>	453
Chromatin Folding: From Linear Chromosomes to the 4D Nucleus <i>T. Cheutin, F. Bantignies, B. Leblanc, and G. Cavalli</i>	461
Functional Nuclear Organization of Transcription and DNA Replication: A Topographical Marriage between Chromatin Domains and the Interchromatin Compartment <i>Y. Markaki, M. Gunkel, L. Schermelleh, S. Beichmanis, J. Neumann, M. Heidemann, H. Leonhardt, D. Eick, C. Cremer, and T. Cremer</i>	475
Window into the Complexities of Chromosome Interactomes <i>A. Göndör, A. Fernandez Woodbridge, C. Shi, E. Aurell, M. Imreh, and R. Ohlsson</i>	493
Transcription Factories and Nuclear Organization of the Genome <i>C.H. Eskiw, N.F. Cope, I. Clay, S. Schoenfelder, T. Nagano, and P. Fraser</i>	501
Role of Nuclear Architecture in Epigenetic Alterations in Cancer <i>H.P. Easwaran and S.B. Baylin</i>	507

Nuclear Periphery

Role of the Nuclear Lamina in Genome Organization and Gene Expression <i>D. Peric-Hupkes and B. van Steensel</i>	517
Nuclear Lamins in Cell Regulation and Disease <i>T. Shimi, V. Butin-Israeli, S.A. Adam, and R.D. Goldman</i>	525
Lamina-Independent Lamins in the Nuclear Interior Serve Important Functions <i>T. Dechat, K. Gesson, and R. Foisner</i>	533
Three-Dimensional Organization of Chromatids by Nuclear Envelope–Associated Structures <i>G. Blobel</i>	545
Repetitive Transgenes in <i>C. elegans</i> Accumulate Heterochromatic Marks and Are Sequestered at the Nuclear Envelope in a Copy Number- and Lamin-Dependent Manner <i>B.D. Towbin, P. Meister, B.L. Pike, and S.M. Gasser</i>	555
The Mechanism of Nucleocytoplasmic Transport through the Nuclear Pore Complex <i>J. Tetenbaum-Novatt and M.P. Rout</i>	567
Nuclear Pore Complexes: Guardians of the Nuclear Genome <i>M. Capelson, C. Doucet, and M.W. Hetzer</i>	585
Structure and Function of the Perinucleolar Compartment in Cancer Cells <i>A. Slusarczyk, R. Kamath, C. Wang, D. Anchel, C. Pollock, M.A. Lewandowska, T. Fitzpatrick, D.P. Bazett-Jones, and S. Huang</i>	599
Summary: The Nucleus—A Close-Knit Community of Dynamic Structures <i>S. Henikoff</i>	607
