**COLD SPRING HARBOR SYMPOSIA
ON QUANTITATIVE BIOLOGY
VOLUME LXXVI**

symposium.cshlp.org

Institutions that have purchased the hardcover edition of this book are entitled to online access to the Symposium website. Please contact your institution's library to gain access to the website. The site contains the full-text articles from the 2011 Symposium and previous Symposia from 2004 onward.

If you have ordered previous volumes and your online access has already been activated, your online access will be extended to May 31, 2013. If you received this book from your agent, please have your agent contact us for your activation instructions.

If you have never activated your online access and do not have an account number or are experiencing access problems, please contact Kathy Cirone, CSHL Press Subscription Manager, at 1-800-843-4388, extension 4044 (Continental U.S. and Canada), 1-516-422-4100 (all other locations), cironek@cshl.edu, or squ-feedback@highwire.Stanford.edu.

COLD SPRING HARBOR SYMPOSIA ON QUANTITATIVE BIOLOGY

VOLUME LXXVI

Metabolism and Disease

symposium.cshlp.org

Meeting organized by Terri Grodzicker, David Stewart, and Bruce Stillman

COLD SPRING HARBOR SYMPOSIA ON QUANTITATIVE BIOLOGY

Founded in 1933 by

REGINALD G. HARRIS

Director of the Biological Laboratory 1924 to 1936

Previous Symposia Volumes

I (1933) Surface Phenomena	XXXVII (1972) The Mechanism of Muscle Contraction
II (1934) Aspects of Growth	XXXVIII (1973) Chromosome Structure and Function
III (1935) Photochemical Reactions	XXXIX (1974) Tumor Viruses
IV (1936) Excitation Phenomena	XL (1975) The Synapse
V (1937) Internal Secretions	XLI (1976) Origins of Lymphocyte Diversity
VI (1938) Protein Chemistry	XLII (1977) Chromatin
VII (1939) Biological Oxidations	XLIII (1978) DNA: Replication and Recombination
VIII (1940) Permeability and the Nature of Cell Membranes	XLIV (1979) Viral Oncogenes
IX (1941) Genes and Chromosomes: Structure and Organization	XLV (1980) Movable Genetic Elements
X (1942) The Relation of Hormones to Development	XLVI (1981) Organization of the Cytoplasm
XI (1946) Heredity and Variation in Microorganisms	XLVII (1982) Structures of DNA
XII (1947) Nucleic Acids and Nucleoproteins	XLVIII (1983) Molecular Neurobiology
XIII (1948) Biological Applications of Tracer Elements	XLIX (1984) Recombination at the DNA Level
XIV (1949) Amino Acids and Proteins	L (1985) Molecular Biology of Development
XV (1950) Origin and Evolution of Man	LI (1986) Molecular Biology of <i>Homo sapiens</i>
XVI (1951) Genes and Mutations	LII (1987) Evolution of Catalytic Function
XVII (1952) The Neuron	LIII (1988) Molecular Biology of Signal Transduction
XVIII (1953) Viruses	LIV (1989) Immunological Recognition
XIX (1954) The Mammalian Fetus: Physiological Aspects of Development	LV (1990) The Brain
XX (1955) Population Genetics: The Nature and Causes of Genetic Variability in Population	LVI (1991) The Cell Cycle
XXI (1956) Genetic Mechanisms: Structure and Function	LVII (1992) The Cell Surface
XXII (1957) Population Studies: Animal Ecology and Demography	LVIII (1993) DNA and Chromosomes
XXIII (1958) Exchange of Genetic Material: Mechanism and Consequences	LVIX (1994) The Molecular Genetics of Cancer
XXIV (1959) Genetics and Twentieth Century Darwinism	LX (1995) Protein Kinesis: The Dynamics of Protein Trafficking and Stability
XXV (1960) Biological Clocks	LXI (1996) Function & Dysfunction in the Nervous System
XXVI (1961) Cellular Regulatory Mechanisms	LXII (1997) Pattern Formation during Development
XXVII (1962) Basic Mechanisms in Animal Virus Biology	LXIII (1998) Mechanisms of Transcription
XXVIII (1963) Synthesis and Structure of Macromolecules	LXIV (1999) Signaling and Gene Expression in the Immune System
XXIX (1964) Human Genetics	LXV (2000) Biological Responses to DNA Damage
XXX (1965) Sensory Receptors	LXVI (2001) The Ribosome
XXXI (1966) The Genetic Code	LXVII (2002) The Cardiovascular System
XXXII (1967) Antibodies	LXVIII (2003) The Genome of <i>Homo sapiens</i>
XXXIII (1968) Replication of DNA in Microorganisms	LXIX (2004) Epigenetics
XXXIV (1969) The Mechanism of Protein Synthesis	LXX (2005) Molecular Approaches to Controlling Cancer
XXXV (1970) Transcription of Genetic Material	LXXI (2006) Regulatory RNAs
XXXVI (1971) Structure and Function of Proteins at the Three-dimensional Level	LXXII (2007) Clocks and Rhythms
	LXXIII (2008) Control and Regulation of Stem Cells
	LXXIV (2009) Evolution: The Molecular Landscape
	LXXV (2010) Nuclear Organization and Function

Front cover (paperback): The three-dimensional tomographic reconstruction of a mitochondrion found in the soma of a cerebellar purkinje cell shows the topology of the cristae typical for large neuronal mitochondria. The mitochondrial outer membrane is shown in blue, the inner boundary membrane in gray, and the cristae in gold. The cristae shapes are tubular, lamellar, or portions of each type merged together to form a complex topological arrangement of branching. (Image provided by Guy Perkins and Mark Ellisman, NCMIR, University of California at San Diego.)

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cold Spring Harbor Laboratory Press, provided that the appropriate fee is paid directly to the Copyright Clearance Center (CCC). Write or call CCC at 222 Rosewood Drive, Danvers, MA 01923 (508-750-8400) for information about fees and regulations. Prior to photocopying items for educational classroom use, contact CCC at the above address. Additional information on CCC can be obtained at CCC Online at www.copyright.com.

For a complete catalog of all Cold Spring Harbor Laboratory Press publications, visit our website www.cshlpress.org.

Website access: Institutions that have purchased the hardcover edition of this book are entitled to online access to the companion website at symposium.cshlp.org. For assistance with activation, please contact Kathy Cirone, CSHL Press Subscription Manager, at cironek@cshl.edu.

Symposium Participants

- ACHARYA, SANKET, Massachusetts General Hospital, Center for Regenerative Medicine, Somerville
- ACKERMAN, DANIEL, Dept. of Genetics, Environment and Evolution, University College London, United Kingdom
- ALLAN, SARAH, Disease Models and Mechanisms, Cambridge, United Kingdom
- AMON, ANGELIKA, Massachusetts Institute of Technology Cancer Center, Cambridge, Massachusetts
- ANDERTON, BRITTANY, Dept. of Medicine, University of California, San Francisco
- ANDRADE, RAFAELA, Dept. of Biochemistry and Molecular Biology, Dalhousie University, Halifax, Canada
- ARIAS, IRWIN, Dept. of Cell Biology and Metabolism, National Institutes of Health, Bethesda, Maryland
- AUWERX, JOHAN, École Polytechnique Fédérale de Lausanne, Switzerland
- AZZARA, ANTHONY, Dept. of Metabolic Disease, Bristol-Myers Squibb, Pennington, New Jersey
- BASS, JOSEPH, Dept. of Medicine, Northwestern University Medical School, Evanston, Illinois
- BASU, NIRMALYA, Molecular Reproduction, Development, and Genetics, Indian Institute of Science, Bangalore, India
- BAUSE, ALEXANDRA, Dept. of Pathology and Cell Biology, Harvard Medical School, Boston, Massachusetts
- BELLET, MARINA, Dept. of Pharmacology, University of California, Irvine
- BERGER, SHELLEY, Dept. of Cell and Developmental Biology, University of Pennsylvania, Philadelphia
- BICKEL, PERRY, Institute of Molecular Medicine, University of Texas Health Science Center, Houston
- BITTMAN, KEVIN, Seahorse Bioscience, North Billerica, Massachusetts
- BJEDOV, IVANA, Dept. of Genetics, Evolution, and Environment, University College London, United Kingdom
- BOSCH-PRESEGUÉ, LAIA, Bellvitge Biomedical Research Institute (IDIBELL), PEBC, Hospitalet de Llobregat, Spain
- BOTSTEIN, DAVID, Lewis-Sigler Institute, Princeton University, Princeton, New Jersey
- BRAAS, DANIEL, Dept. of Molecular and Medical Pharmacology, Institute for Molecular Medicine, University of California, Los Angeles
- BRADNER, JAMES, Dept. of Adult Oncology, Dana-Farber Cancer Institute, Boston, Massachusetts
- BROWN, KATHLEEN, GlaxoSmithKline, Research Triangle Park, North Carolina
- BROWN, MICHAEL, Dept. of Molecular Genetics, University of Texas Southwestern Medical Center, Dallas
- BRUGGE, JOAN, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- BURG, DOMINIC, ANZAC Research Institute, Concord, Australia
- CALKHOVEN, CORNELIS, Fritz Lipmann Institute, Jena, Germany
- CANTO, CARLOS, École Polytechnique Fédérale de Lausanne, Switzerland
- CARRET, CELINE, EMBO, Heidelberg, Germany
- CAUSTON, HELEN, Dept. of Biological Sciences, Columbia University, New York
- CHANG, HUNG-CHUN, Dept. of Biology, Massachusetts Institute of Technology, Cambridge
- CHAPPLE, RICHARD, Dept. of Animal Sciences, University of Missouri, Columbia
- CHEN, CHONG, Memorial Sloan-Kettering Cancer Center, New York
- CHEN, JIANDONG, Dept. of Molecular Biology, Moffitt Cancer Center, Tampa, Florida
- CHEN, MIAO-HSUEH, Dept. of Pediatrics, Baylor College of Medicine, Houston, Texas
- CHEN, MUHAN, Cold Spring Harbor Laboratory, New York
- CHEONG, HEESUN, Dept. of Cancer Biology, University of Pennsylvania, Philadelphia
- CHO, HYEJIN, Cold Spring Harbor Laboratory, New York
- CONNELL, LAUREEN, Cold Spring Harbor Laboratory Press, Woodbury, New York
- COSTFORD, SHEILA, Dept. of Metabolic Signaling and Disease, Sanford-Burnham Medical Research Institute, Orlando, Florida
- DANG, CHI, Johns Hopkins University School of Medicine, Baltimore, Maryland
- DANG, LENNY, Dept. of Biochemistry, Agios Pharmaceuticals Inc., Cambridge, Massachusetts
- DANN, STEVEN, Oncology Research Unit, Pfizer, Pearl River, New York
- DICKSON, ADDIE, Dept. of Pathology, University of Texas Southwestern Medical Center, Dallas
- DISPIRITO, JOANNA, Div. of Endocrinology, Diabetes, and Metabolism, University of Pennsylvania, Philadelphia
- DOMINGOS, ANA, The Rockefeller University, New York
- DUBOWITZ, VICTOR, Dubowitz Neuromuscular Centre, University of London, United Kingdom
- DYAR, KENNETH, Muscle Gene Regulation, Venetian Institute of Molecular Medicine, Padova, Italy
- ECKEL-MAHAN, KRISTIN, Dept. of Pharmacology, University of California, Irvine
- EGAN, DANIEL, Salk Institute, University of California, San Diego, La Jolla
- EGUCHI, JUN, Dept. of Endocrinology and Diabetes, Okayama University, Okayama, Japan
- EICHNER, LILLIAN, Dept. of Biochemistry, McGill University, Montreal, Canada
- EMAMBOKUS, NIKLA, *Cell Metabolism*/Cell Press, Cambridge, Massachusetts
- ENGIN, FEYZA, Dept. of Genetics and Complex Diseases, Harvard School of Public Health, Boston, Massachusetts
- ENTCHEV, EUGENI, MRC Centre for Developmental Neurobiology, King's College London, United Kingdom
- EVANS, ALLYSON, *Molecular Cell*/Cell Press, Cambridge, Massachusetts
- EVANS, RONALD, Salk Institute, Howard Hughes Medical Institute, La Jolla, California
- EVERETT, LOGAN, Institute for Diabetes, Obesity, and Metabolism, University of Pennsylvania, Philadelphia
- FENG, DAN, Institute for Diabetes, Obesity, and Metabolism, University of Pennsylvania, Philadelphia
- FENG, QIN, Dept. of Molecular and Cellular Biology, Baylor College of Medicine, Houston, Texas
- FENG, XIAOJIANG, Dept. of Chemistry, Princeton University, Princeton, New Jersey
- FERNANDEZ ROJO, MANUEL, Institute for Molecular Bioscience, University of Queensland, Brisbane, Australia
- FERRICK, DAVID, Dept. of Biology and Applications, Seahorse Bioscience, North Billerica, Massachusetts
- FINLEY, LYDIA, Dept. of Pathology, Harvard Medical School, Boston, Massachusetts
- FLEMING, MICHAEL, Novartis Institutes for Biomedical Research, Cambridge, Massachusetts
- FREZZA, CHRISTIAN, Beatson Institute for Cancer Research, Glasgow, Scotland, United Kingdom
- FRIEDMAN, JEFFREY, Dept. of Molecular Genetics, The Rockefeller University, New York

- FU, SUNENG, Dept. of Genetics and Complex Diseases, Harvard School of Public Health, Boston, Massachusetts
- FUKAMACHI, TOSHIHIKO, Dept. of Pharmaceutical Science, Chiba University, Japan
- GERHART-HINES, ZACH, Dept. of Cancer Biology, Dana-Farber Cancer Institute, Boston, Massachusetts
- GERMAN, NATALIE, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- GIGUÈRE, VINCENT, Goodman Cancer Research Centre, McGill University, Montreal, Canada
- GILLESPIE, MARC, Reactome, Jamaica, New York
- GLENN, DENIS, Diabetes Center, University of California, San Francisco
- GLOVER-CUTTER, KIRA, Dept. of Developmental and Stem Cell Biology, Joslin Diabetes Center—Harvard Medical School, Boston, Massachusetts
- GOGA, ANDREI, Dept. of Medicine, University of California, San Francisco
- GOLDSTEIN, JOSEPH, Dept. of Molecular Genetics, University of Texas Southwestern Medical Center, Dallas
- GONZALEZ-GIRONES, DIANA, Dept. of Physiological Sciences, University of Barcelona-IDIBELL, Spain
- GOTTLIEB, EYAL, The Beatson Institute for Cancer Research, Glasgow, Scotland, United Kingdom
- GRODZICKER, TERRI, James Laboratory, Cold Spring Harbor Laboratory, New York
- GUAN, KUN-LIANG, Moores Cancer Center, University of California, San Diego, La Jolla
- GUARENTE, LEONARD, Dept. of Biology, Massachusetts Institute of Technology, Cambridge
- GUERTIN, DAVID, University of Massachusetts Medical School, Worcester
- HAMMOND, CRAIG, Eli Lilly and Company, Indianapolis, Indiana
- HAQUE, AFTABUL, Cold Spring Harbor Laboratory, New York
- HARDIE, GRAHAME, Dept. of Molecular Physiology, University of Dundee, Scotland, United Kingdom
- HARTLEBEN, GÖTZ, Translational Control, Fritz-Lipmann Institute, Jena, Germany
- HASENFUSS, SEBASTIAN, CNIO, Cancer Cell Biology Program, Madrid, Spain
- HEEMELS, MARIE-THERESE, *Nature*, London, United Kingdom
- HELENUS, KATIA, Institute of Biotechnology, University of Helsinki, Helsinki, Finland
- HIRSCHEY, MATTHEW, Dept. of Medicine, Duke University, Durham, North Carolina
- HOLMSTROM, SAM, Dept. of Pharmacology, University of Texas Southwestern Medical Center, Dallas
- HURTADO, DEBBY, Seahorse Bioscience, Ringwood, New Jersey
- HWANG, JAE-WOONG, Dept. of Environmental Medicine, University of Rochester Medical Center, Rochester, New York
- IGNATOVA, IRENA, Dept. of Pharmacology, University of Virginia, Charlottesville
- INGLIS, JOHN, Cold Spring Harbor Laboratory Press, Woodbury, New York
- ISHIDA, SEIKO, Dept. of Life Sciences, École Polytechnique Fédérale de Lausanne, Switzerland
- ISHII, TAKAMASA, Dept. of Molecular Life Science, Tokai University School of Medicine, Kanagawa, Japan
- ISRAELSEN, WILL, Koch Institute, Massachusetts Institute of Technology, Cambridge
- IWAHARA, TOSHINORI, Dept. of Biochemistry, New York University School of Medicine, New York
- JAIN, MO, Broad Institute, Cambridge, Massachusetts
- JAKIMO, ALAN, Hofstra University, Hempstead, New York
- JAMIESON, WHITNEY, Dept. of Genetics and Tumor Cell Biology, St. Jude Children's Research Hospital, Memphis, Tennessee
- JHA, ABHISHEK, Agios Pharmaceuticals, Cambridge, Massachusetts
- JOHNSON, ZACHARY, Koch Institute, Massachusetts Institute of Technology, Cambridge
- KADOWAKI, TAKASHI, Dept. of Diabetes and Metabolic Diseases, Tokyo University Medical School, Japan
- KAELEN, WILLIAM, Dept. of Medical Oncology, Howard Hughes Medical Institute, Dana-Farber Cancer Institute, Boston, Massachusetts
- KAHN, BARBARA, Dept. of Diabetes and Metabolism, Beth Israel Deaconess Medical Center and Harvard Medical School, Boston, Massachusetts
- KAHN, C. RONALD, Joslin Diabetes Center, Boston, Massachusetts
- KAJIMURA, SHINGO, Diabetes Center, University of California, San Francisco
- KALAANY, NADA, Dept. of Endocrinology, Children's Hospital Boston, Massachusetts
- KANEKO, KOTARO, National Institute of Child Health & Human Development, National Institutes of Health, Bethesda, Maryland
- KARIN, MICHAEL, Dept. of Pharmacology, University of California, San Diego, La Jolla
- KARSENTY, GERARD, Dept. of Genetics and Development, Columbia University, New York
- KATO, SHIGEAKI, Dept. of Molecular and Cellular Biosciences, University of Tokyo, Japan
- KELLY, DANIEL, Sanford-Burnham Medical Research Institute at Lake Nona, Orlando, Florida
- KEMPER, KIM, Dept. of Molecular and Integrative Physiology, University of Illinois at Urbana-Champaign
- KEMPPAINEN, ESKO, University of Tampere, Finland
- KENYON, CYNTHIA, University of California, San Francisco
- KIBERSTIS, PAULA, *Science*, Washington, D.C.
- KIR, SERKAN, Dept. of Pharmacology, University of Texas Southwestern Medical Center, Dallas
- KOBAYASHI, AKIRA, Dept. of Life and Medical Sciences, Doshisha University, Kyotanabe, Japan
- KODE ARUNA, Dept. of Medicine, Columbia University Medical Center, New York
- KONOPKA, WITOLD, Dept. of Molecular Biology of the Cell, German Cancer Research Center (DKFZ), Heidelberg, Germany
- KRUGER, ROBERT, *Cell*, Cambridge, Massachusetts
- KWIATKOWSKI, NICHOLAS, Dept. of Biological Chemistry and Molecular Pharmacology, Harvard Medical School, Boston, Massachusetts
- KWON, YUN KYUNG (SOPHIA), Dept. of Biology, Massachusetts Institute of Technology, Cambridge
- LARSEN, NICCOLE, Seahorse Bioscience, North Billerica, Massachusetts
- LAZAR, MITCHELL, Institute for Diabetes, Obesity, and Metabolism, University of Pennsylvania, Philadelphia
- LEE, IN HYE, National Heart, Lung, and Blood Institute, National Institutes of Health, Bethesda, Maryland
- LEE, JAE, Dept. of Molecular and Cellular Biology, Baylor College of Medicine, Houston, Texas
- LEE, SIU SYLVIA, Dept. of Molecular Biology and Genetics, Cornell University, Ithaca, New York
- LEOW, SHI CHI, Signal Transduction, A*STAR Institute of Molecular and Cell Biology, Singapore
- LI, LINGBO, Dept. of Biological Sciences, Stanford University, Stanford, California
- LI, SIMING, Life Sciences Institute, University of Michigan, Ann Arbor
- LI, YAZHOU, National Institute on Aging, National Institutes of Health, Baltimore, Maryland
- LIEBERTHAL, WILFRED, Dept. of Medicine, Stony Brook Health Science Center, New York
- LIEW, CHONG WEE, Joslin Diabetes Center, Boston, Massachusetts
- LIU, KIKI, Cold Spring Harbor Laboratory, New York
- LOMBARDI, DONALD, Dept. of Chemical Physiology, The Scripps Research Institute, La Jolla, California
- LOSICK, RICHARD, Harvard University, Cambridge, Massachusetts
- LOYTER, ABRAHAM, Dept. of Biological Chemistry, Hebrew University of Jerusalem, Israel
- LU, BO, Dept. of Radiation Oncology, Thomas Jefferson University, Philadelphia, Pennsylvania
- LU, LONG-SHENG, Dept. of Molecular Biology, Texas Heart Institute, Houston
- LUENGO, JUAN, Oncology Research and Development, GSK Pharmaceuticals, Collegeville, Pennsylvania
- MA, DI, Dept. of Cell and Developmental Biology, Life Sciences Institute, University of Michigan, Ann Arbor
- MACIVER, NANCIE, Dept. of Pediatrics, Duke University Medical Center, Durham, North Carolina
- MACLEOD, KAY, Ben May Institute for Cancer Research, University of Chicago, Flossmoor, Illinois

SYMPOSIUM PARTICIPANTS

vii

- MAIR, WILLIAM, Dept. of Molecular and Cellular Biology, Salk Institute for Biological Studies, La Jolla, California
- MAK, TAK, Princess Margaret Hospital, Ontario Cancer Institute, Toronto, Canada
- MANDRUP, SUSANNE, Dept. of Biochemistry and Molecular Biology, University of Southern Denmark, Odense
- MANGELSDORF, DAVID, Dept. of Pharmacology, Howard Hughes Medical Institute, University of Texas Southwestern Medical Center, Dallas
- MAO, STEVE, Cold Spring Harbor Laboratory, New York
- MARCUS, EMILIE, *Cell*, Cambridge, Massachusetts
- MARIGNANI, PAOLA, Dept. of Biochemistry and Molecular Biology, Dalhousie University, Halifax, Canada
- MASON, STEVEN, *Nature Structural & Molecular Biology*, New York
- MATHEW, ROBIN, University of Medicine and Dentistry of New Jersey, New Brunswick
- MATTAINI, KATIE, Dept. of Biology, Massachusetts Institute of Technology, Cambridge
- MAZLOUM, NAYEF, Dept. of Microbiology and Immunology, Weill Cornell Medical College in Qatar, Doha
- MCCARTHY, NICOLA, *Nature Publishing Group*, London, United Kingdom
- McKNIGHT, STEVEN, Dept. of Biochemistry, University of Texas Southwestern Medical Center, Dallas
- McMILLAN, DANIEL, Internal Medicine, University of Texas Southwestern Medical Center, Dallas
- MERGENTHALER, PHILIPP, Dept. of Experimental Neurology, Charité Universitätsmedizin Berlin, Germany
- MERKSAMER, PHILIP, Dept. of Virology and Immunology, The J. David Gladstone Institutes, San Francisco, California
- MIZUSHIMA, NOBORU, Dept. of Physiology and Cell Biology, Tokyo Medical and Dental University, Japan
- MORIMOTO, RICHARD, Dept. of Molecular Biosciences, Northwestern University, Evanston, Illinois
- MÜLLER, CHRISTINE, Fritz Lipmann Institute, Jena, Germany
- MUOIO, DEBORAH, Dept. of Pharmacology and Cancer Biology, Duke University School of Medicine, Durham, North Carolina
- MURANEN, TARU, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- NÄÄR, ANDERS, Massachusetts General Hospital Cancer Center, Harvard Medical School, Charlestown, Massachusetts
- NARKAR, VIHANG, University of Texas Health Science Center at Houston, Institute of Molecular Medicine, Houston
- NEWGARD, CHRISTOPHER, Dept. of Pharmacology and Cancer Biology, Duke University Medical Center, Durham, North Carolina
- NILSSON, ROLAND, Karolinska University Hospital, Karolinska Institutet, Stockholm, Sweden
- NORBERG, ERIK, Dept. of Cancer Biology, Dana-Farber Cancer Institute, Boston, Massachusetts
- NORBERG, HELIN, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- NORIEGA, LILIA, INCMNSZ, Fisiología de la Nutrición, Tlalpan, Mexico
- OHLSTEIN, BENJAMIN, Dept. of Genetics and Development, Columbia University Medical Center, New York
- OLENCHOCK, BENJAMIN, Dept. of Medicine, Brigham and Women's Hospital, Boston, Massachusetts
- OROSZ, ANDRAS, National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health, Bethesda, Maryland
- O'ROURKE, EYLEEN, Dept. of Molecular Biology, Massachusetts General Hospital, Boston
- OWEN, JOSHUA, Dept. of Molecular Genetics, University of Texas Southwestern Medical Center, Dallas
- PANG, TIN YAU, Dept. of Physics and Astronomy, Stony Brook University, New York
- PAPARO, ANTHONY, St. George's University, Great River, New York
- PAPARO, KATHLEEN, St. George's University, Great River, New York
- PAULY, BARBARA, *EMBO Reports*, Heidelberg, Germany
- PEDERSON, THORU, Dept. of Biochemistry and Molecular Pharmacology, University of Massachusetts Medical School, Worcester
- PENG, MIN, Dept. of Immunology, Memorial Sloan-Kettering Cancer Center, New York
- PERRONE, CARMEN, Orentreich Foundation, Cold-Spring-on-Hudson, New York
- PHAN, LIEM MINH, Dept. of Molecular and Cellular Oncology, M.D. Anderson Cancer Center, Houston, Texas
- PIROLA, CARLOS, Dept. of Molecular Genetics and Biology of the Complex Disease, CONICET, Institute of Medical Research-IDIEM, Buenos Aires, Argentina
- POSUKH, OLGA, Dept. of Molecular and Cellular Biology, Institute of Chemical Biology and Fundamental Medicine, Novosibirsk, Russia
- POWLEY, IAN, MRC Toxicology, University of Leicester, United Kingdom
- PUIGSERVER, PERE, Dana-Farber Cancer Institute, Harvard Medical School, Boston, Massachusetts
- PURDY, JOHN, Lewis-Sigler Institute for Integrative Genomics, Princeton University, Princeton, New Jersey
- PURUSHOTHAM, APARNA, National Institute of Environmental Health Sciences, National Institutes of Health, Durham, North Carolina
- RAMUNDO, SILVIA, Dept. of Molecular Biology, University of Geneva, Switzerland
- RAPPAPORT, AMY, Cold Spring Harbor Laboratory, New York
- REINBERG, DANNY, Dept. of Biochemistry, Howard Hughes Medical Institute, New York University School of Medicine, New York
- ROBCIUC, MARIUS, Dept. of Chronic Disease Prevention, National Institute for Health and Welfare, Helsinki, Finland
- ROBERTSON, MIRANDA, BioMed Central, London, United Kingdom
- RODEHEFFER, MATTHEW, Dept. of Comparative Medicine, Yale University, New Haven, Connecticut
- RON-HAREL, NOGA, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- RONNEBAUM, SARAH, McAllister Heart Institute, University of North Carolina at Chapel Hill
- ROTTER, DAVID, Dept. of Internal Medicine-Cardiology, University of Texas Southwestern Medical Center, Dallas
- RUAN, HONG, Biology Innovation Laboratory, PepsiCo, New Haven, Connecticut
- RUKA, KRISTEN, Dept. of Molecular and Integrative Physiology, University of Michigan, Ann Arbor
- RUVKUN, GARY, Dept. of Molecular Biology, Massachusetts General Hospital, Boston
- SABATINI, DAVID, Whitehead Institute Biology, Cambridge, Massachusetts
- SAEKI, SATOSHI, Drug Discovery Research Laboratories, Kyowa Hakko Kirin, Sunto-gun, Shizuoka, Japan
- SASSONE-CORSI, PAOLO, Dept. of Pharmacology, University of California, Irvine
- SCHIAFFINO, STEFANO, Centro Interdipartimentale, Studio Segnali Cell, University of Padova, Italy
- SCHIBLER, ULRICH, Dept. of Molecular Biology, University of Geneva, Switzerland
- SCUOPPO, CLAUDIO, Cold Spring Harbor Laboratory, New York
- SEMENZA, GREGG, Institute of Genetic Medicine, Johns Hopkins University School of Medicine, Baltimore, Maryland
- SEMOVA, IVANA, Dept. of Cell and Molecular Physiology, University of North Carolina at Chapel Hill
- SEVER, RICHARD, Cold Spring Harbor Laboratory Press, Woodbury, New York
- SHAW, REUBEN, Molecular and Cell Biology Laboratory, Salk Institute for Biological Studies, La Jolla, California
- SHERBET, DANIEL, Dept. of Molecular Genetics, University of Texas Southwestern Medical Center, Dallas
- SHI, CHENGXI, Dept. of Microbiology, Tumor and Cell Biology, Karolinska Institute, Stockholm, Sweden
- SHI, JUNWEI, Cold Spring Harbor Laboratory, New York
- SHIRAKI, TAKUMA, Kinki University, Faculty of Biology-Oriented Science and Technology, Kinokawa-city, Japan
- SHULMAN, GERALD, Howard Hughes Medical Institute, Yale Medical School, New Haven, Connecticut
- SIEBER, MATTHEW, Dept. of Human Genetics, University of Utah School of Medicine, Salt Lake City
- SILVER, PAMELA, Dept. of Systems Biology, Harvard Medical School, Boston, Massachusetts
- SIMCOX, JUDITH, Dept. of Biochemistry, University of Utah, Salt Lake City
- SIMS, ROBERT, Dept. of Biology, Constellation Pharmaceuticals, Cambridge, Massachusetts

- SINCLAIR, DAVID, Dept. of Pathology, Harvard Medical School, Boston, Massachusetts
- SMIT, MARIA, Cold Spring Harbor Laboratory Press, Woodbury, New York
- SMITH, PHILIP, National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, Bethesda, Maryland
- SONENBERG, NAHUM, Dept. of Biochemistry, McGill University, Montreal, Canada
- SONG, LOLING, Dept. of Cell Biology, Harvard Medical School, Boston, Massachusetts
- SOOKOIAN, SILVIA, Dept. of Clinical and Molecular Hepatology, CONICET, Institute of Medical Research-IDIM, Buenos Aires, Argentina
- SORONEN, JARKKO, Institute for Molecular Medicine Finland, University of Helsinki, Finland
- SPIEGELMAN, BRUCE, Dept. of Cell Biology, Dana-Farber Cancer Institute, Harvard Medical School, Boston, Massachusetts
- STEWART, DAVID, Meetings and Courses Program, Cold Spring Harbor Laboratory, New York
- STILLMAN, BRUCE, President, Cold Spring Harbor Laboratory, New York
- STILZ, HANS ULRICH, Sanofi-Aventis, Frankfurt am Main, Germany
- STUART, SHAWN, Dept. of Biochemistry and Cell Biology, Stony Brook University, New York
- SUN, XIAO-HONG, Dept. of Immunobiology, Oklahoma Medical Research Foundation, Oklahoma City
- SUN, YUXIANG, Dept. of Pediatrics and Molecular and Cellular Biology, Baylor College of Medicine, Houston, Texas
- SUZUKI, KENSUKE, Pharmaceutical Frontier Research Laboratories, JT Inc., Yokohama, Japan
- TAKADA, ICHIRO, Dept. of Microbiology and Immunology, Keio University School of Medicine, Tokyo, Japan
- TALCHAI, CHUTIMA, Dept. of Medicine, Columbia University, New York
- TANG, YUN-CHI, Koch Institute for Integrative Cancer Research, Massachusetts Institute of Technology, Cambridge, Massachusetts
- TENNESSEN, JASON, Dept. of Human Genetics, University of Utah, Salt Lake City
- THOMPSON, CRAIG, President and CEO, Memorial Sloan-Kettering Cancer Center, New York
- TONTONOZ, PETER, Dept. of Pathology and Laboratory Medicine, Howard Hughes Medical Institute, University of California, Los Angeles
- TORRES, ANNMARIE, Dept. of Genetics, Stony Brook University, New York
- TU, BENJAMIN, Dept. of Biochemistry, University of Texas Southwestern Medical Center, Dallas
- UHLENHAUT, NINA HENRIETTE, Max Delbrück Center for Molecular Medicine, Berlin, Germany
- UNAL, ELCIN, Koch Institute for Integrative Cancer Research, Howard Hughes Medical Institute, Massachusetts Institute of Technology, Cambridge
- VADYSIRISACK, DOUANGSONE, Dept. of Hematology and Oncology, Massachusetts General Hospital Cancer Center, Boston
- VANDER HEIDEN, MATTHEW, Koch Institute for Integrative Cancer Research, Massachusetts Institute of Technology, Cambridge
- VAZQUEZ, ALEXEI, Dept. of Radiation Oncology, Cancer Institute of New Jersey, Robert Wood Johnson Medical School, University of Medicine and Dentistry of New Jersey, New Brunswick
- VERDIN, ERIC, Dept. of Virology and Immunology, J. David Gladstone Institutes, San Francisco, California
- VILLANUEVA, CLAUDIO, Dept. of Pathology and Laboratory Medicine, University of California, Los Angeles
- VINSON, CHARLES, Laboratory of Metabolism, National Cancer Institute, National Institutes of Health, Bethesda, Maryland
- VOUSDEN, KAREN, Tumour Suppressor Laboratory, Beatson Institute for Cancer Research, Glasgow, Scotland, United Kingdom
- VUGREK, OLIVER, Dept. of Molecular Medicine, Rudjer Boskovic Institute, Zagreb, Croatia
- WAGERS, AMY, Dept. of Stem Cell and Regenerative Biology, Harvard University, Cambridge, Massachusetts
- WALKER, AMY, Massachusetts General Hospital, Harvard Medical School, Boston
- WALLACE, DOUGLAS, Center for Mitochondrial and Epigenomic Medicine, Children's Hospital of Philadelphia, University of Pennsylvania, Philadelphia
- WANG, FENFEN, Dept. of Biology, University of Pennsylvania, Philadelphia
- WANG, HONG, Dept. of Medicine/Endocrinology, University of Colorado Anschutz Medical Campus, Aurora
- WANG, RUONING, Dept. of Immunology, St. Jude's Children Hospital, Memphis, Tennessee
- WANG, TAO, GlaxoSmithKline, King of Prussia, Pennsylvania
- WANG, XIAODONG, Zhongguancun Life Science Park, Beijing, China
- WANG, YING-HUA, Massachusetts General Hospital, Center for Regenerative Medicine, Harvard University, Boston
- WANG, ZHENXUN, Cold Spring Harbor Laboratory, New York
- WATANABE, MITSUHIRO, Molecular Metabolism and System Medicine, Keio University School of Medicine, Tokyo, Japan
- WATTS, JENNIFER, Washington State University School of Molecular Biosciences, Pullman
- WEGIEL, BARBARA, Beth Israel Deaconess Medical Center, Harvard Medical School, Boston, Massachusetts
- WELCH, AARON, Dept. of Molecular Cell Biology, University of California, Berkeley
- WELLEN, KATHRYN, Dept. of Cancer Biology, University of Pennsylvania, Philadelphia
- WEST, DAVID, Dept. of Nutrition, Children's Hospital Oakland Research Institute, Oakland, California

*First row: B. Stillman, R. Evans, J. Goldstein; E. Gottlieb, A. Vazquez, S. Mason
 Second row: V. Dubowitz, M. Pollock; H. Cheong; C. Kenyon, D. Mangelsdorf
 Third row: D. Kelly; D. Sabatini; S. Ramundo, S. McKnight, U. Schibler
 Fourth row: I. Semova, J. DiSpirito; R. Sever, G. Karsenty; C. Dang*

First row: W. Mair, H. Uhlenhaut; D. Kelly, R. Kruger, A. Evans; B. Spiegelman, M.-T. Heemels
Second row: Lunch on Blackford lawn; E. Verdin and caricaturist
Third row: J. Bass; D. Braas, S. Hasenfuss, G. Harteben; J. Luengo
Fourth row: G. Karsenty, P. Kiberstis; R. Mathew, N. Mizushima; C. Calkhoven, C. Muller

*First row: W. Arias, D. Mangelsdorf; M. Karin, E. White; P. Silver
 Second row: D. Stewart, X. Wang; Y. Xia, J. Bradner
 Third row: M. Robertson, B. Spiegelman; R. Shaw
 Fourth row: T. Muranen; N. Sonenberg, D. Spector; T. Mak, X. Wang*

*First row: C. Talchai, P. Bickel; G. Semenza; S. Mandrup, D. Stewart
 Second row: Participants and their caricatures; C. Thompson
 Third row: L. Guarente; Symposium picnic
 Fourth row: J. Auwerx, J. Witkowski; B. Stillman, D. Botstein*

*First row: Jan Witkowski interviewing J. Goldstein and M. Brown; I. Bjedov, H. Causton
Second row: D. Wallace; C. Perrone, K. Paparo, A. Paparo; R. Morimoto
Third row: S. Stuart, S. Sookoian; J. Brugge, M. Fernandez Rojo, D. Gonzalez-Girona
Fourth row: R. Andrade; A. Haque presenting his poster; A. Naar*

First row: C.R. Kahn; E. Marcus, G. Hardie; P. Sassone-Corsi
Second row: I. Hye Lee, N. German; A. Vazquez; E. Gottlieb, K. Vousden
Third row: Symposium wine and cheese party
Fourth row: S. Berger, D. Reinberg; M. Lazar; N. McCarthy interviewing M. Vander Heiden

Foreword

Cold Spring Harbor Laboratory selected the theme of Metabolism and Disease for the historic 76th Symposium in the series. The decision to focus the 2011 Symposium on this topic reflects the growing convergence of lines of research in fields ranging from cancer biology to aging, demonstrating that key metabolic pathways regulate energy homeostasis in cells, organs, and whole organisms, and that many human diseases share profound dysfunction in metabolism at a molecular level. Previous Symposia that have been devoted in all or in part to metabolism and its dysfunction include Biological Oxidations (1939), The Mammalian Fetus: Physiological Aspects of Development (1954), Cellular Regulatory Mechanisms (1961), The Cardiovascular System (2002), and Clocks and Rhythms (2007).

A key theme of early 20th-century investigation, cellular bioenergetics, yielded a vast body of biochemical knowledge about key energy transformation processes such as oxidative phosphorylation and glycosylation. In contrast, the molecular biology revolution of the last half century has focused largely on how cells and organisms process information stored in nucleic acid and how these mechanisms are regulated during fundamental processes, such as cell division and development, or adapt and respond to external conditions. Tremendous light has been shed on processes such as DNA replication, transcription, RNA processing, and protein translation and, more recently, on signaling cascades, developmental lineages, and disease progression (e.g., oncogenesis). Much of this work has been done with little regard for the metabolic state of the cell, which could be safely ignored while the reductionist approach yielded such powerful results. But energy consumption at the cellular and organismal level is once again becoming a major theme of modern research, because imbalances in these processes are increasingly understood to be major contributory factors in many diseases that significantly impact society, including obesity, cardiovascular disease, diabetes, metabolic disorders, and cancer. Moreover, energy homeostasis appears to have a significant impact on the aging process itself.

The Symposium aimed to integrate a very broad field of investigative effort, bringing together advances in our understanding of energy intake, consumption, and storage (diet, exercise, and fat), oxygen regulation and hypoxia, circadian rhythms, and life span/aging. The Symposium explored metabolism at molecular (gene expression, posttranslational modifications, protein turnover, cofactors and integrators, hormones, and signals), organellar (mitochondria), cellular, organ system (cardiovascular, bone), and organismal (timing and life span) scales. Diseases impacted by metabolic imbalance or dysregulation that were covered in detail included diabetes, obesity, metabolic syndrome, and cancer. New and emerging technologies were presented for simultaneous monitoring of hundreds of metabolites that allow for sophisticated sampling of the metabolic state of cells. Because the Symposium covered such a broad field, by necessity much excellent work could not be included, and instead, the Proceedings should be viewed as a necessarily eclectic collection of some of the most interesting and stimulating work that came to the organizers' attention during the 18 months before the meeting.

In arranging this Symposium, the organizers were dependent on the guidance of a broad cadre of advisors including Drs. Ron Evans, Lenny Guarente, David Sabatini, Bruce Spiegelman, Craig Thompson, Eileen White, and Douglas Wallace. Opening night speakers included Douglas Wallace, Ron Evans, Cynthia Kenyon, and Craig Thompson. Nobel laureates Joe Goldstein and Mike Brown jointly presented the Reginald Harris lecture on "Surviving Starvation: Essential Role of the Ghrelin-Growth Hormone Axis." Cynthia Kenyon delivered a compelling Dorcas Cummings lecture on "The Deadly Sweet Tooth" to Laboratory friends, neighbors, and Symposium participants in advance of the annual dinner parties. Steven McKnight concluded the meeting with a masterful and thought-provoking summary.

This Symposium was attended by almost 300 scientists from more than 20 countries, and the program included 62 invited presentations and 131 poster presentations. To disseminate the latest results and discussion of the Symposium to a wider audience, attendees were able to share many of the Symposium talks with colleagues who were unable to attend by using the Leading Strand video archive, and interviews by Emilie Marcus, Miranda Robertson, Richard Sever, and Jan Witkowski with leading experts in the field were arranged during the Symposium and distributed as free video from the Cold Spring Harbor Symposium interviews website.

We thank Val Pakaluk, Mary Smith, and Ed Campodonico and his staff, in the Meetings and Courses Program, for their assistance in organizing and running the Symposium, and John Inglis and his staff at Cold Spring Harbor Laboratory Press, particularly Rena Steuer, Inez Sialiano, and Kathy Bubbeo, for publishing the printed and online versions of the Symposium proceedings. Photographer Connie Brukin captured candid snapshots throughout the meeting.

Funds to support this meeting were obtained from the National Institute of General Medical Sciences, the Eunice Kennedy Shriver National Institute of Child Health and Human Development, the National Institute of Diabetes and Digestive and Kidney Diseases, and the National Institute on Aging, all branches of the National Institutes of Health; Amgen; and Seahorse Biosciences. Financial support from the corporate sponsors of our meetings program is essential for these Symposia to remain a success and we are most grateful for their continued support.
